

Concept Elite LCD Terminal

The Elite LCD Terminal is an alternative interface for entering Access PIN numbers for the Integriti system. Its iconic design, 20 key backlit keypad and LCD display allow you to quickly perform typical operations, review system activity and, program all options.

The LCD display allows plain text navigation through operations and alarms, events and items are presented by name.

Elite LCD Terminals are used to perform programming and User operations, display alarm messages and review system activity. A backlit keypad allows for positive PIN & data entry and indicator LEDs provide Area/system status information.

This Multi-Lingual version also provides support for multiple character sets and allows the Installer to choose the character set that matches the Language provided in the Control Module firmware.

Key Features

- Compatible with Integriti & Concept 4000 Controllers
- May be installed as a flush-mount or surface mount unit
