

# HERITAGE

GATES & FENCES™

## PREMIUM ALUMINIUM GATES

# ABOUT US

For over 25 years, the Heritage Gates brand has been known for the highest quality gates and fencing, with exceptional attention to detail. With a wide range of traditional styles through to contemporary designs, the Heritage range will include a solution for any type of property.

Heritage Gates started out in Wanganui in the 1990's as a family business manufacturing wooden gates and fences using traditional manufacturing techniques and acquiring a reputation for high-quality craftsmanship. In 2009 aluminium gates were added to the range and over the years, new ways of working with aluminium have been developed. In particular, the Heritage team perfected the art of replicating traditional timber gates in full aluminium construction. These gates look just like the old timber styles but with the long-term durability and low-maintenance advantages of aluminium.

Heritage Gates & Fences was acquired by Boundaryline Fencing Systems In 2017, and the Heritage range was merged fully with Boundaryline in early 2020.

Our client-focused team look forward to working with you to help find a great solution for your project.

## ADVANTAGES OF ALUMINIUM GATES

NASHVILLE

- **Strong & Durable** - yet light in weight, Aluminium will not warp or split in the weather.
- **Versatile** - Aluminium can be fabricated into many different designs, from modern designs to styles that replicate traditional timber gates.
- **Lower Cost of Purchase & Maintenance** - Aluminium gates require much less maintenance than timber gates.
- **Corrosion Resistant** - Aluminium will not rust.
- **Powder-Coated Finish** - The pre-treatment process and high-quality powder-coating system is guaranteed to give you a premium protective finish.
- **Made to Measure** - Gates and fences can be constructed to suit any property. Designs can be adapted for single or double swing gates, sliding gates, or sliding cantilever gates.
- **Guarantee Quality** - Manufactured to the highest standard, aluminium gates are guaranteed for 5 years (conditions apply).

# THE ALUMINIUM SELECTION

## ALUMINIUM | GATES & FENCES

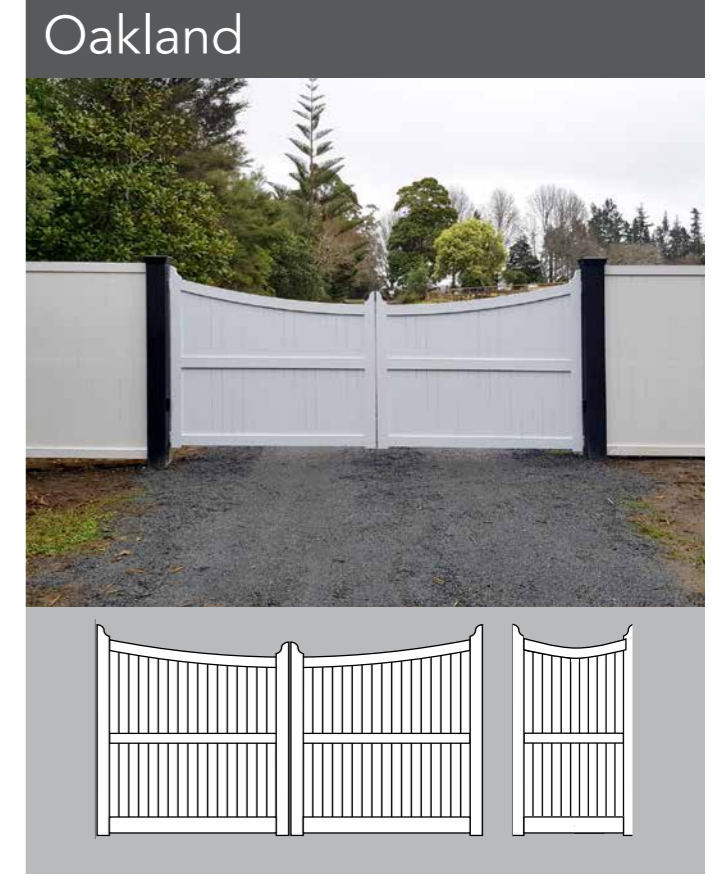

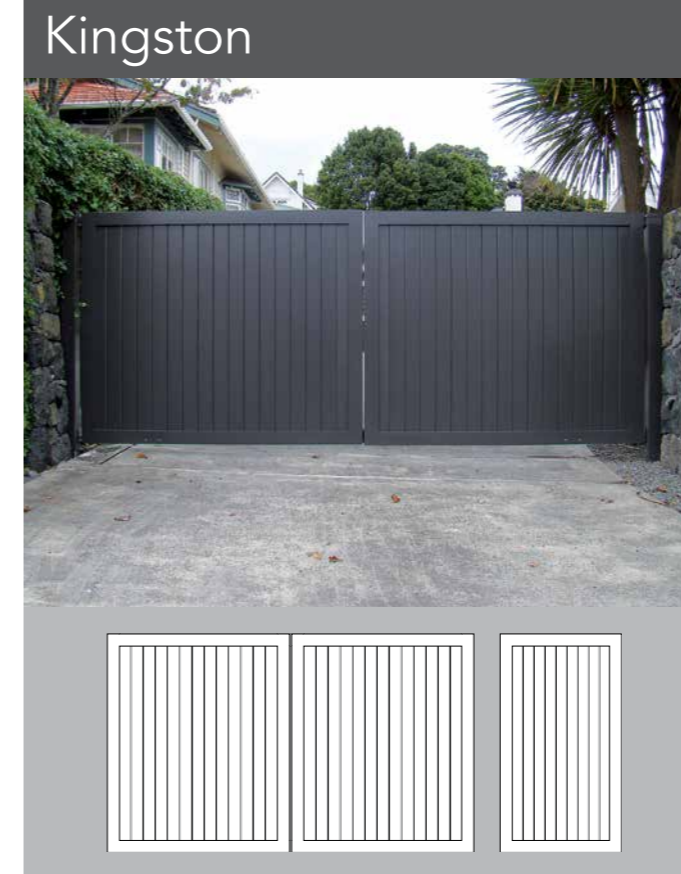

### ALUMINIUM GATES & FENCES

The Heritage range replicates traditional timber designs in powdercoated aluminium. We've developed our manufacturing processes and designs over the years to offer a traditional-looking gate without the high maintenance requirements of timber gates.

Aluminium gates are much lighter than timber, making them easier to operate and better for automated gates. Most importantly aluminium will not warp or split in the weather, the way timber gates can. It is especially suitable for dark-coloured gates.

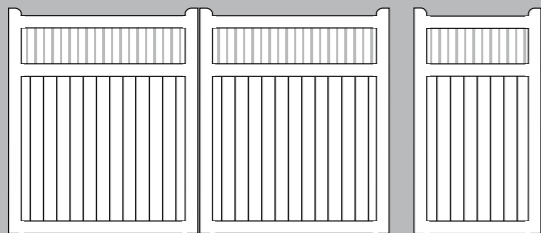

We have a wide range of traditional and modern designs and a huge range of colour choices, to suit any projects.

Most designs are suitable and adaptable for swing gates, sliding gates, and matching fence panels.

LATCHES, LOCKS & HINGES FOR ALUMINIUM GATES

LATCHES & LOCKS

Snap Latch    Pad Bolt    Loop Latch    Side Pull Magnetic Latch    Locking Latch    Double Sided Locking Latch

Magnetic Pool Latch    Digital Mechanical Lock    Mortice Lock    Cane Bolt

HINGES

1. Anti-Theft Bracket  
2. Adjustable Socket  
3. Nylon Insert  
4. Plate Gudgeon

Stainless Steel Self-closing Butt Hinge    Light Duty Self-closing Hinges    Heavy Duty Self-closing Hinges

Other hinge & latches options available

POWDER-COATING OPTIONS

Selection shown, other colours available. For further colours contact Heritage Gates: 0800 428 379

All care has been taken to ensure colour swatches are an accurate representation of the final product as far as the printing process will allow. However Heritage Gates will assume no responsibility for inaccuracy due to variations dictated by the printing process itself. For best colour matching come and see our showroom samples or call 0800 428 379 for a colour swatch.

AUTOMATION & ACCESS CONTROLS

SWING GATE

Articulating Arm swing gate openers are designed for swing gates installed on large pillars.

Electro mechanical swing gate openers are designed in various versions for easy and functional use for residential or commercial applications.

SLIDING GATE

Sliding gate openers are available in many configurations, from light weight residential applications through to heavy duty industrial applications.

POWDER-COATING PROCESS

The powder-coating process starts with the metal components being cleaned, which helps the coating to adhere to the metal. The process is carried out in multi-stages;

- A de-greaser and etch is used to clean the metal, followed by a thorough rinse down.
- Next a chromate bonder is applied to help the powder adhere to the aluminium.
- A drying oven is often used to ensure no moisture is present when the items are powder-coated.
- The components are then passed through a spray booth where the powder is applied by electro-static spray guns.
- Once the powder has been applied it then goes through a curing oven where the particles melt and fuse together and adhere to the metal surface.

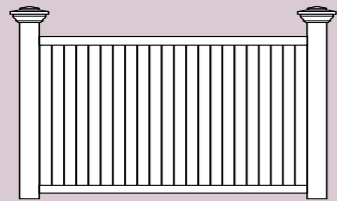

This produces a uniform, smooth and durable finish.

## TIMBER | CAPS & TOPS

Replica Caps and Classic Tops

### Caps & Tops

#### REPLICA CAPS

The moulding of the Replica Caps is mitred around the top of the post and are custom made to suit each post.

##### 45 SERIES

PLAIN PYRAMID BALL ACORN

Made to suit 100x75 to 200x200mm posts.

##### 90 SERIES

PLAIN PYRAMID BALL ACORN

Made to suit 125x125 to 400x400mm posts.

#### CLASSIC TOPS

Classic tops are fixed to the tops of 100x75mm or 100x100mm posts. The Plain & Pyramid are also available for 125x125mm & 150x150mm posts.

### GUARANTEE OF QUALITY

We provide a five-year warranty on powder-coated aluminium gates and fences. We provide a two-year warranty on timber kitset fencing; provided protective coatings with a minimum light reflectance value of 60% are applied prior to the product being exposed to the weather. Any warranty expressly excludes defects that have arisen as a result of vandalism, fair wear and tear, and climatic conditions. Particularly, timber fencing which is made from a natural product and some movement of the timber and formation of surface splits will occur with exposure to the weather; these features are not covered by any warranty.

We provide a two-year warranty on automation and access equipment.

This guarantee is dependent on the product being maintained in accordance with our maintenance guidelines and does not cover damage done to the gate by inadequate or inappropriate hardware or installation.

Conditions apply to the above summary; full details of our warranties are available on request.

#### DISCLAIMER

Although every effort has been made to ensure the information in this brochure is accurate, no responsibility is accepted for any errors or omissions in this brochure, nor for any specifications or work based on this information.

Pictures of some designs may be representative only and some may show custom features not included in the standard specification. We reserve the right to change designs or specifications without notice.

Please contact us with your requirements and we will assist with any design clarification.
